

Project Part 1: Topic Selection

Website Name: Gordon's Animanga & Light Novel List (Still working on the name)

Description: I'm thinking of making a website kind of similar to Myanimelist. Pretty much it'll be a database of Anime and Manga while also adding light novels to the mix as well. I plan to add some of the extensive amounts of anime I've watched over the years, and I think it'd be cool to scroll through a website with all of them rather than have them in a text document like I do now. My idea is that people would be able to go to the site and choose between scrolling through a list of anime, manga, or light novels. Linked to the page should be references to the respective other versions of the series. For example, say you click on Naruto as an anime, you'd then see its manga somewhere mentioned alongside it. If it's a series with a light novel and manga, then both would be listed. Otherwise, you could scroll through lists of the three categories.

Pages:

1. Home
2. Anime List
3. Manga List
4. Light Novel List
5. About the Site / Creator
